

OLYMPIC GAMES MEDALS

Materials supplied in the kit:

- Card Circle
- Red Ribbon
- Metallic colored special effect paper
- Sports stickers

Materials needed but not supplied:

- Scissors
- One hole punch (optional)

Procedure:

1. Place a card circle on the white side of the metallic paper, use a pencil to draw a circle on the paper along the card circle.
2. Cut the circle out from the metallic paper.
3. Select a sport sticker as you like and stick onto one side of the card circle. Stick the metallic paper circle onto the other side of the card circle. The metallic paper is self-adhesive. So just peel off the back and stick onto card circle. If the card circle has a pre-punched hole, make sure the hole is on top of the logo.
4. If the card circle does not have a hole, use a one hole punch to punch a hole on the top edge of the circle.
5. Cut an appropriate length of red ribbon, go through the hole, and tie up the ends.
6. Hang the medal onto your neck and you are the winner of the Olympic Games!
